## 1 Career Summary

Aspiring software engineer specializing in Web3 and full-stack development, currently pursuing a Bachelor of Science in Software Engineering. Experienced in building impactful Web3 applications with a focus on usability and real-world problem-solving. Eager to collaborate with innovative teams to create valuable, user-centric products.

## 2 Skills

### • Technical Skills

- Frontend: React, Next.js, HTML5, CSS3, JavaScript
- *Backend*: Node.js, Express
- *Database*: PostgreSQL, MongoDB
- *Web3*: Blockchain integration
- *Version Control*: Git, GitHub
- *Others*: REST APIs, JWT Authentication

### • Soft Skills

- Technical Writing, Time Management, Problem Solving, Communication & Collaboration

## 3 Projects

### 3.1 Gastronom Bot

Telegram bot for real-time gas fee tracking across blockchain networks with user-customized alerts.

**Tech Stack:** Node.js, MongoDB, Telegram Bot API, Web3

**Role:** Full-stack development, API integration, real-time data handling

**GitHub:** <https://github.com/bwire-official/Gastronaut-bot.git>

### 3.2 KoruSync

Productivity app for Web3 professionals and students to manage tasks and goals.

**Tech Stack:** Next.js, Supabase, Tailwind CSS

**Role:** Full-stack development, UI/UX design, AI-driven features

**GitHub:** <https://github.com/bwire-official/KoruSync.git>

### 3.3 Moodify App

An ai Music playlist generator based on user mood.

**Tech Stack:** React Native, Firebase, Spotify API, YouTube API

**Role:** Full-stack development, API integration, UI/UX design

**GitHub:** <https://github.com/bwire-official/Moodify-App.git>

### 3.4 Hostel Tracking System

QR code-based check-in/out system for students with real-time admin monitoring.

**Tech Stack:** Node.js, MongoDB, Express

**Role:** Backend development, API design, QR code integration

**GitHub:** <https://github.com/bwire-official/hostel-tracking-system.git>

## 4 Education

**Bachelor of Science in Software Engineering**

Ritman University – Expected Graduation: 2027

## 5 Work Experience

**Full-Stack Developer (Freelance/Contract)**

Web3 Projects | 2023–Present

- Developed and maintained Web3 applications, including tracking systems and productivity tools.
- Integrated blockchain technology to enhance data security and decentralization.
